Numerical analysis is the study of algorithms that use numerical approximation (as opposed to general symbolic manipulations) for the problems of mathematical analysis (as distinguished from discrete mathematics). Numerical analysis naturally finds application in all fields of engineering and the physical sciences, but in the 21st century also the life sciences, social sciences, medicine ...

The above table shows that the above expression is a very good approximation to the total number of culling operations for sieve ranges of about a hundred thousand (10^5) and above.. Algorithmic complexity. The sieve of Eratosthenes is a popular way to benchmark computer performance. As can be seen from the above by removing all constant offsets and constant factors and ignoring terms that ...
