The Engineering area contains most of the reference material needed to design and construct a Capital Program project. Included are topics about Policy, Procedures, Specifications and Design Standards (Manuals, Guidelines, and Computer Aided Design and Drafting drawings).

### **Engineering - New Jersey**

A bridge is a structure built to span physical obstacles without closing the way underneath such as a body of water, valley, or road, for the purpose of providing passage over the obstacle, usually something that can be detrimental to cross otherwise. There are many different designs that each serve a particular purpose and apply to different situations.
