

origins of architectural pleasure pdf

Architecture is both the process and the product of planning, designing, and constructing buildings or any other structures. Architectural works, in the material form of buildings, are often perceived as cultural symbols and as works of art. Historical civilizations are often identified with their surviving architectural achievements.

One of the Greatest Monuments in the World but Who Built

Chinese architecture demonstrates an architectural style that developed over millennia in China, before spreading out to influence architecture all throughout East Asia. Since the solidification of the style in the early imperial period, the structural principles of Chinese architecture have remained largely unchanged, the main changes being only the decorative details.
