SAR Specific Data Formats & SAR Data Processing

Processing of SAR Data shows how SAR imagery is formed, how interferometry SAR images are created, and gives you a detailed mathematical description of different focussing algorithms with special emphasis in interferometry. The book describes in a comprehensive manner new methods and algorithms for interferometric processing of SAR data.

Tutorial: Basic SAR Processing and Analysis Data Fusion SAR data complement other types of data by providing spatial information that other data do not contain. Conversely, SAR data do not have the composition expressed in multispectral, optical data. Therefore, a combined SAR/optical data analysis is usually required.
